

Best-in-class Business Intelligence with SAP BOXI 4.0

November 30, 2011

Flexso has the pleasure to invite you to a free seminar about the latest SAP BI 4.0 release. You will get an update on both SAP BOXI 4.0 and SAP BW 7.3, illustrated with live demos.

Join us on November 30 and benefit from Flexso's proven BI knowhow and the early product experience built up during our ramp-up projects with SAP Business Objects 4.0. Our experts will provide a clear overview of the major improvements, best practices and lessons learned from the BOXI 4.0 partner ramp-up program.

What can you expect?

- Get an update on the latest SAP Business Intelligence solutions: which new features & functionalities are delivered with SAP Business Objects 4.0 ?
- Evaluate the level of end-user autonomy with BOXI 4.0 reporting tools
- Find out about new functionalities in BW 7.3 : new data acquisition opportunities, hybrid providers, etc;
- Discover the integration approach for BI 4.0 : best practices for architecture, authentication, authorizations, multi-language, etc;
- Learn about the key success factors for a smooth migration to BI 4.0;
- Get clear recommendations on when to use which reporting tool and how to handle a transition in the toolset, with a focus on Web Intelligence, Dashboards and Analysis for MS Office & OLAP.

We are convinced that this workshop will provide you with plenty of ideas and insights about the capabilities of the SAP BI 4.0 suite for all your reporting and dashboarding requirements.

Our experts will walk you through use case scenarios and will be available for discussing questions specific to your company and your business needs.

Experts in SAP Business Intelligence

Flexso is a leading SAP Service Partner in Belgium and Luxemburg and provides all the up-to-date expertise and business knowhow you need to implement and integrate SAP solutions and technologies.
