

Flexso Core for Project-Driven Manufacturing

SPEED UP YOUR ENGINEER-TO-ORDER PROCESSES

In today's digital, fast-changing world, speed, agility and flexibility have become more important than ever, especially for manufacturing companies. If you design, manufacture and/or assemble customized products, you know how hard it is to engineer and build products efficiently, while staying in control of costs and delivery dates. Do you have the tools you need to work in a lean, agile way? The all-in-one Flexso Core for Project-Driven Manufacturing helps you run simple.

WHAT IS FLEXSO CORE FOR PROJECT-DRIVEN MANUFACTURING?

An all-in-one solution that helps manufacturing companies to **SPEED UP** their engineering and production cycles, with tight cost control. Qualified by SAP, the package combines the power of the **SAP S/4HANA** in-memory-platform with **BEST PRACTICES**. Moreover, it comes at a fixed price with a fixed implementation time – to ensure quick value.

FOR WHO?

Project driven manufacturing involved in:

- make-to-stock, make-to-order, engineer-to-order projects
- assembly, configure-to-order / variant production
- supply chain management process integration
- all mixed-mode types

YOUR BENEFITS

FAST TIME TO VALUE

Flexso Core for Project-Driven Manufacturing is ready to use. On top of best practices, it includes a pre-defined scope, methodology and services (e.g. manuals to simplify and speed up your go-live, as well as end-user adoption).

USER-FRIENDLY APPS

All apps include personalized Fiori user experience and are intuitive and fun to work with. On top, they are future-proof for the next SAP S/4HANA releases.

MINIMAL RISK

The package is delivered at a fixed price, with a fixed implementation time.

SCALABLE PACKAGE

It's easy to expand the package and to integrate innovations as your company grows and your needs evolve.

CHOICE OF DEPLOYMENT OPTIONS

On-premise or in the cloud.

SEAMLESS INTEGRATION

with **Microsoft and SAP solutions**.

Benefit from **FLEXSO'S EXPERTISE, EXPERIENCE AND PROVEN METHODOLOGIES** in project driven manufacturing.

Ready to embrace **THE INTELLIGENT ENTERPRISE**.

“A clear scope and predictable cost can help you meet your project deadlines, stay on budget and quickly achieve your business goals.”

HOW DOES FLEXSO CORE FOR PROJECT-DRIVEN MANUFACTURING HELP?

- 01** **Benefit from the power and innovation of SAP S/4HANA**, as your future-proof solution.
- 02** **Automate quotations** based on the input/experience of engineers.
- 03** **Optimize your planning**, thanks to smooth integration with MS Project and SAP Project System.
- 04** **Link your engineering**
Transfer your engineering Bill of Materials towards your material BOM in SAP.
- 05** **Choose whether to manufacture internally or to out-source**, based on a clear overview.
- 06** **Transfer project stock**: get a one-click overview of the stock reserved for your project.
- 07** **Automate time registration** on the shop floor.
- 08** **Easy generation of routings for production** to win time.

Deployment	Implementation cost*	License cost	Number of users
S/4HANA on Premise	Start from € 275.000	Start from € 30.000	Start from 10 users
